DETAILED ACTION

1. This action is in response to the Application No. 09/891,010 filed on June 25, 2001 in which claims 1-25 are pending. It carries priority from Application No. 09/538934 filed on March 31, 2000.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-7, 9-22, 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Walker (US Patent No. 6,234,896).

As per claims 1-7, 9-22, 25, Walker discloses a gaming system including a network server connected to a plurality of gaming devices, comprising at least one of video poker machine, video blackjack machine, video roulette machine, video keno machine, video bingo machine and the like. Walker provides player tracking cards to players and

Art Unit: 3713

a card reader and buttons (touchscreen) to enable players to input data into the machines. Each slot machine is adapted to receive player data such as ID number and to generate a gaming result and a corresponding payout parameter for each play. The player data and payout parameters from each slot machine are then transmitted to network server, via network interface. Walker further provides a system, wherein a player can terminate a video presentation at a gaming device and can resume display of the video presentation from the point of termination, at another time or gaming device. The reference to Walker is deemed to meet the limitations in this instant invention as claimed.

Allowable Subject Matter

3. Claims 8-9, 23-24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. US Patent No. 6,431,983 to Acres, which teaches method for providing incentive to play gaming devices connected by a network to a host computer.
 - b. US Patent No. 6,319,127 to Walker et al., which teach gaming device and a method of operating same.
 - c. US Patent No. 6,273,820 to Haste, III, which teaches virtual player gaming method.
 - d. US Patent No. 4,752,068 to Endo, which teaches video game machine for business.

Recent Statutory Changes to 35 U.S.C. § 102(e)

On November 2, 2002, President Bush signed the 21st Century Department of Justice Appropriations Authorization Act (H.R. 2215) (Pub. L. 107-273, 116 Stat. 1758 (2002)), which further amended 35 U.S.C. § 102(e), as revised by the American Inventors Protection Act of 1999 (AIPA) (Pub. L. 106-113, 113 Stat. 1501 (1999)). The revised provisions in 35 U.S.C. § 102(e) are completely retroactive and effective immediately for all applications being examined or patents being reexamined. Until all of the Office's automated systems are updated to reflect the revised statute, citation to the revised statute in Office actions is provided by this attachment. This attachment also substitutes for any citation of the text of 35 U.S.C. § 102(e), if made, in the attached Office action.

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 in view of the AIPA and H.R. 2215 that forms the basis for the rejections under this section made in the attached Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

35 U.S.C. § 102(e), as revised by the AIPA and H.R. 2215, applies to all qualifying references, except when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. For such patents, the prior art date is determined under 35 U.S.C. § 102(e) as it existed prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. § 102(e)).

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 prior to the amendment by the AIPA that forms the basis for the rejections under this section made in the attached Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
